The Title to Vol. II. will precede No. XVII., which will begin the Second Volume, to be completed by No. XXXII., the present and last of the Sessional Series, thus making each Volume to consist of an equal quantity in Sixteen Numbers.*

NOTE TO CORRESPONDENTS.

Our Correspondents have large claims on our gratitude for the great pleasure which their able and interesting Communications have afforded to us; as they have also, no doubt, to all our Readers. The subjects on which they treat are invariably important—their style is in harmony with their thoughts, for both are elevated and polished; and we shall rejoice at hearing from them all again, when we resume our general political character at the commencement of the ensuing Session. We believe that this department of our Review *will bear comparison with that of any public Journal in existence: and if its publication had effected no other object than that of bringing out the Contributions of so many philanthropic and patriotic minds, it would have been well worthy the undertaking. But we know it has done more: and the spirit which its pages in the past has kindled, we shall endeavour in the pages of the future to invigorate and prolong.*
